Contents of Volume 73

Number 1, 8 July 1978

PARKER, G. A., Selection on Non-random Fusion of Gametes During the Evolution of Anisogamy 1

KHARKYANEN, V. N., PETROV, E. G. and UKRAINSKII, I. I., Donor–Acceptor Model of Electron Transfer Through Proteins . . 29

STEIN, T. P., Cachexia, Gluconeogenesis and Progressive Weight Loss in Cancer Patients 51

FAGEN, R. M., Information Measures: Statistical Confidence Limits and Inference 61

HULBERT, A. J., The Thyroid Hormones: A Thesis Concerning their Action 81

GROSSBERG, S., Decisions, Patterns and Oscillations in Nonlinear Competitive Systems with Applications to Volterra-Lotka Systems 101

JUNG, A., BARTHOLDI, P., MERMILLOD, B., REEVE, J. and NEER, R., Critical Analysis of Methods for Analysing Human Calcium Kinetics 131

LESTIENNE P., The Specificity of Aminoacylation: a tRNA–tRNA Interaction Model 159

EDELSTEIN, L. and ROSEN, R., Enzyme-substrate Recognition . . 181

Number 2, 22 July 1978

ARGYRAKIS, P. and KOPELMAN, R., Exciton Percolation III. Stochastic and Coherent Migration in Binary and Ternary Random Lattices 205

NICHOLLS, P., MARTIN, J. M. and KAHN, J., A Mathematical Model Predicting Chromosome Loss in Cultured Cells of Young Adults 237

BELL, G., The Evolution of Anisogamy 247

THIBAULT, P., A New Attempt to Study the Oxygen Evolving System of Photosynthesis: Determination of Transition Probabilities of a State *i* 271

COURTNEY, K. R., Extended Moment Analysis for Binomial Parameters of Transmitter Release 285

HAEFNER, J. W., Ecosystem Assembly Grammars: Generative Capacity and Empirical Adequacy 293

LAPIDUS, I. R., Time Periods of Morphological Stages in Populations of Differentiating Micro-organisms 319

CUTLER, D. J., On the Definition of the Compartment Concept in Pharmacokinetics 329

CHARLESWORTH, B., The Population Genetics of Anisogamy . . 347

LETTERS TO THE EDITOR

COSTE, J., PEYRAUD, J. and COULLET, P., Does Complexity Favor the Existence of Persistent Ecosystems? . . . 359

HASTINGS, D. F. and GUTKNECHT, J., Potassium and Turgor Pressure in Plants 363

Number 3, 8 August 1978

BRETAG, A. H., HURST, C. A. and KERR, D. I. B., Potassium Conductance Models Related to an Interactive Subunit Membrane II. Monte Carlo Analysis and Subunit Migration 367

MARSHALL, E. A. and WINDLE, D. W., Ion Transfer during Electrolyte Osmosis through a Charged Porous Membrane . . . 383

GARAY, R. P. and LEFEVER, R., A Kinetic Approach to the Immunology of Cancer: Stationary States Properties of Effector-Target Cell Reactions 417

BENGTSSON, B. O., Avoiding Inbreeding: at What Cost? . . 439

MOREL, J. E., Force–Velocity Relationship in Single Muscle Fibres . 445

ROOMANS, G. M. and BORST-PAUWELS, G. W. F. H., Co-transport of Anions and Neutral Solutes with Cations Across Charged Biological Membranes. Effects of Surface Potential on Uptake Kinetics 453

WOHLGEMUTH, A., Abstract Immunogenetic Systems 469

BARD, J. B. L., A Quantitative Model of Liver Regeneration in the Rat 509

SMITH, H. J., Perspectives in The Design of Small Molecule Enzyme Inhibitors As Useful Drugs 531

ELDRIDGE, C. A. and MOROWITZ, H. J., A Hydrodynamic Theory of Ion Conductance Through Ohmic Pores 539

VAN DRUTEN, J. A. M., PEER, P. G. M., BOS, A. B. H. and DE JONG, W. W., Reciprocal Amino Acid Substitutions in the Evolution of Homologous Peptides 549

LEGUIZAMÓN, C. A., TENREYRO, E. A. A. and PECORINI, V., Coronary Flow. Method of Returning Coronary Bolus 563

Number 4, 22 August 1978

FRIEDMAN, M. A., CARTER, W. H., STAUB, J. and SEGRETI, A., Relative Mutagenic Potencies Determined in the Micronucleus Test . 575

CHERNAVSKII, D. S. and RUIJGROK, TH. W., Dissipative Structures in Morphogenetic Models of the Turing Type 585

GHOSH, P. K. and SENGUPTA, D., A Model for the Temperature Dependence of Membrane Excitability 609

LERMAN, M. I., The Biological Essence of Resting Cells in Cell Populations 615

THOMAS, R., Logical Analysis of Systems Comprising Feedback Loops 631

VAN CAUTER, E. and DUMONT, J. E., Cross Inhibition Models for the Transmission of Hormonal Signals 657

ORLOVE, M. J. and WOOD, C. L., Coefficients of Relationship and Coefficients of Relatedness in Kin Selection: A Covariance Form for the RHO Formula 679

COOPER, W. E. JR., Home Range Criteria Based on Temporal Stability of Areal Occupation 687

MIKULECKY, D. C. and THOMAS, S. R., A Simple Network Thermodynamic Method for Series-parallel Coupled Flows. III. Application to Coupled Solute and Volume Flows Through Epithelial Membranes 697

ROSENBERGER, R. F., GROVER, N. B., ZARITSKY, A. and WOLDRINGH, C. L., Surface Growth in Rod-shaped Bacteria . . . 711

TYSON, J. and SACHSENMAIER, W., Is Nuclear Division in *Physarum* Controlled by a Continuous Limit Cycle Oscillator?. . . 723

TAGAMI, Y., A Perm-Selective Model Membrane Exhibiting Oscillatory Behavior 739

MILCH, J. R., The Dynamical Stability of Isometrically Contracting Muscle and its Relation to Transient Force Response . . . 755

LAYZER, D., A Macroscopic Approach to Population Genetics . 769

WATERMAN, M. S. and SMITH, T. F., On the Similarity of Dendrograms 789

Index to Volume 73

Amino acid substitutions in the evolution of homologous peptides, reciprocal, 549
Aminoacylation, the specificity of: a tRNA–tRNA interaction model, 159
Anisogamy, evolution of, selection on non-random fusion of gametes during, 1
Anisogamy, the population genetics of, 347
Areal occupation, home range criteria based on temporal stability of, 687
ARGYRAKIS, P. and KOPELMAN, R., Exciton percolation III. Stochastic and coherent migration in binary and ternary random lattices, 205

Bacteria, rod-shaped, surface growth in, 711
BARD, J. B. L. A quantitative model of liver regeneration in the rat, 509
BARTHOLDI, P. (see JUNG, A.), 131
BELL, G., The evolution of anisogamy, 247
BENGTSSON, B. O., Avoiding inbreeding: at what cost, 439
BORST-PAWELS, G. W. F. H. (see ROOMANS, G. M.), 453
BOS, A. B. H. (see VAN DRUTEN, J. A. M.), 549
BRETAG, A. H., HURST, C. A. and KERR, D. I. B., Potassium conductance models related to an interactive subunit membrane II. Monte Carlo analysis and subunit migration, 367

Cachexia, gluconeogenesis and progressive weight loss in cancer patients, 51
Calcium kinetics, human, critical analysis of methods for analysing, 131
Cancer, a kinetic approach to the immunology of: stationary states properties of effector-target cell reactions, 417
Cancer patients, cachexia, gluconeogenesis and progressive weight loss in, 51
CARTER, W. H. (see FRIEDMAN, M. A.), 575
Cell populations, the biological essence of resting cells in, 615
Cell reactions, effector-target, stationary states properties of, a kinetic approach to the immunology of cancer, 417
Cells, cultured, of young adults, a mathematical model predicting chromosome loss in, 237
Cells in cell populations, the biological essence of resting, 615
CHARLESWORTH, B., The population genetics of anisogamy, 347
CHERNAVSKII, D. S. and RUIJGROK, TH. W., Dissipative structures in morphogenetic models of the turing type, 585
Chromosome loss in cultured cells of young adults, a mathematical model predicting, 237
COOPER, W. E. JR., Home range criteria based on temporal stability of areal occupation, 687
Coronary bolus, methods of returning, coronary flow, 563
Coronary flow, methods of returning coronary bolus, 563
COSTE, J., PEYRAUD, J. and COULLET, P., Does complexity favor the existence of persistent ecosystems? (letter), 359
COULLET, P. (see COSTE, J.), 359
COURTNEY, K. R., Extended moment analysis for binomial parameters of transmitter release, 285
CUTLER, D. J., On the definition of the compartment concept in pharmacokinetics, 329

Dendrograms, on the similarity of, 789
De Jong, W. W. (see Van Druten, J. A. M.), 549
Drugs, perspectives in the designs of small molecule enzyme inhibitors as useful, 531
Dumont, J. E. (see Van Cauter, E.), 657

Ecosystem assembly grammars: generative capacity and empirical adequacy, 293
Ecosystems, persistent, does complexity favor the existence of? (letter), 359
Edelstein, L. and Rosen, R., Enzyme-substrate recognition, 181
Eldridge, C. A. and Morowitz, H. J., A hydrodynamic theory of ion conductance through ohmic pores, 539
Electron transfer through proteins, donor-acceptor models of, 29
Enzyme inhibitors on useful drugs, perspectives in the designs of small molecule, 531
Enzyme-substrate recognition, 181
Exciton percolation III. stochastic and coherent migration in binary and ternary random lattices, 205

Fagen, R. M., Information measures: statistical confidence limits and inference, 61
Feedback loops, logical analysis of systems comprising, 631
Friedman, M. A., Carter, W. H., Staub, J. and Segreti, A., Relative mutagenic potencies determined in the micronucleus text, 575

Gametes, non-random fusion of, selection on, during the evolution of anisogamy, 1
Garay, R. P. and Lefever, R., A kinetic approach to the immunology of cancer: stationary states properties of effector-target cells reactions, 417
Genetics, a macroscopic approach to population, 769
Genetics, population, of anisogamy, 347
Ghosh, P. K. and Sengupta, D., A model for the temperature dependence of membrane excitability, 609
Gluconeogensis, cachexia and progressive weight loss in cancer patients, 51
Grossberg, S., Decisions, patterns and oscillations in nonlinear competitive systems with applications to Volterra–Lotka systems, 101
Grover, N. B. (see Rosenberger, R. F.), 711
